Pratica W21D4

Traccia:

EPICODE

Esercizio
Analisi statica e dinamica

Traccia:

Un giovane dipendente neo assunto segnala al reparto tecnico la presenza di un programma sospetto.
Il suo superiore gli dice di stare tranquillo ma lui non è soddisfatto e chiede supporto al SOC.
Il file "sospetto" è IEXPLORE.EXE contenuto nella cartella C:\Program Files\Internet Explorer (no, non ridete ragazzi)

Come membro senior del SOC ti è richiesto di convincere il dipendente che il file non è maligno.

Possono essere usati gli strumenti di analisi statica basica e/o analisi dinamica basica visti a lezione.
No disassembly no debug o similari

VirusTotal non basta, ovviamente
Non basta dire iexplorer è Microsoft è buono, punto.

Soluzione:

Analizziamo il file IEXPLORE.EXE per valutare la presenza di eventuali azioni sospette. Andiamo ad utilizzare i vari tool utilizzati per l'esercizio precedente, in aggiunta utilizziamo anche il tool **Resource Hacker,** questo è uno strumento di modifica delle risorse per il sistema operativo Windows. È progettato per consentire agli utenti di visualizzare, modificare, aggiungere, ebra o estrarre le risorse incorporate all'interno dei file eseguibili (come .exe, .dll, .ocx, .cpl) e dei file di risorse (come .res o .rc). Queste risorse possono includere icone, immagini, stringhe di testo, cursori, manifesti delle applicazioni e altro ancora.

NON SONO STATE RILEVATE ATTIVITà SOSPETTE.
